- Changelog: <https://www.mageplaza.com/releases/one-step-checkout>
- License agreement: <https://www.mageplaza.com/LICENSE.txt>

## How to install

### Install ready-to-paste package (Recommended)

Installation guide:

<https://www.mageplaza.com/install-magento-2-extension/#solution-1-ready-to-paste>

### How to upgrade

#### Backup

- Backup your Magento code, database before upgrading.
- Remove OSC folder
- In case of customization, you should backup the customized files and modify in newer version.
- Now you remove app/code/Mageplaza/Osc folder. In this step, you can copy override Osc folder but this may cause of compilation issue. That why you should remove it.
- Upload new version
- Upload this package to Magento root directory
- Run command line:

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy
```

---

## FAQs

Q: I got error: Mageplaza\_Core has been already defined

A: Read solution: <https://github.com/mageplaza/module-core/issues/3>

Q: I got compile error

Total Errors Count: 5 Errors during compilation:

A: There are 2 major Mageplaza Osc version: OSC v1.x and OSC v2.x . If you are upgrade from OSC v1.x to V2.x, you should remove app/code/Mageplaza/Osc folder before upgrading.

Q: My site is down

A: Please follow this guide: <https://www.mageplaza.com/blog/magento-site-down.html>
